Testimonials

KIMBERLY GRAY

CEO, Uvii, New York,

The app successfully attracted users and caught the attention of investors. RV Technologies implemented a fluid Scrum methodology, created an outstanding product, and easily accommodated budget limitations.

MARK WRIGHT

Owner & Founder, Hong Kong

RV Technologies successfully delivered the product, and the client expects that the app will gain positive feedback in the near future. Aspects of the project that seemed complex were seamlessly completed by the team.

GLEN WILSON

Director, Full Range Camping

The app's free- and premium membership users rose significantly since RV Technologies Softwares Pvt. Ltd.'s involvement. Internal stakeholders of the camping directory company praised the team's reliability and ability to deliver what was required.

EASWARAN KANASON

Director, NRGEDGE Singapore

The company is quite satisfied with the RV Technology team's performance throughout the duration of the project. The company appreciated the team's reliability and cost-efficiency in carrying out their tasks. The company was most impressed.

Portfolio

Our featured work in product development, mobile and web apps

Grigora - On Demand Food Delivery App

This App Frontend is Developed in Flutter and backend in Node Js, Laravel. This well designed app by our developers makes food delivery quick and easy. You just have to swipe and choose and your favorite meal will be delivered to you in no time. In addition to this, you will be able to find various restaurants with the choice of your food. As soon as the order is placed, you will get a prompt to enter the exact location for the delivery including the estimated time and tracking order in real time.
